

## PINEAPPLE-HI POKER

Pineapple-Hi Poker is played like Texas Hold-Em except:

1. Players receive three down cards each in Pineapple-Hi vs. Two down cards in Texas Hold-Em.
2. Players must discard one of the three down cards if they decide to continue the game and contend for the pot.

All general poker rules and Hold-Em rules apply to Pineapple-Hi Poker.

Blinds are posted as in many other poker games.

Each player is dealt three cards, one at a time, in turn.

Three cards are turned face-up in the middle of the table.

A round of betting ensues for players who wish to continue and contend for the pot.

A fourth card is turned next to the initial three.

A round of betting ensues for players who wish to continue and contend for the pot.

A fifth and final card is turned next to the previous four. These five cards are common to all active players.

A final betting round.

All active players expose their hands. Using two, one or none of their two cards and the five communal cards, the active player with the best five card high hand is awarded the pot.

## CRAZY PINEAPPLE POKER

Crazy Pineapple poker is played exactly like Pineapple Hi Poker with one exception, that is, players who wish to remain in contention for the pot discard one of their personal three cards after the three communal cards are exposed on the table vs. before as in Pineapple Hi Poker.

Pineapple Poker games can also be played Hi-Low.

## TEXAS HOLD-EM

Texas Hold-Em is played using a standard 52-card deck. The object is to make the best high hand among competing players using the traditional ranking of poker hands.

Blinds are posted by players who sit in consecutive clockwise order from the button. Action is initiated on the first betting round by the player on the immediate left of the person who posted the furthest blind clockwise from the button. On all subsequent rounds the action is begun by the first active player from the button.

Each player is dealt two down cards, one at a time, in rotation, in turn.

A round of betting ensues for players who wish to contend and contend for the pot.

Three cards are turned face-up in the middle of the table. These are commonly called the flop.

A round of betting ensues for players who wish to continue and contend for the pot.

A fourth card is turned next to the initial three.

A round of betting ensues for players who wish to continue and contend for the pot.

A fifth and final card is turned next to the previous four. These five cards are common to all active players.

A final betting round.

All active players expose their hand. Using the best of their personal two cards and the five communal cards, the active player with the best five-carded high hand is awarded the pot.

Players may use two, one or none (playing the board) of their personal cards to form their hand.

A new player entering a Hold-Em game may either choose to wait for his/her big blind or post his/her big blind. If he/she posts the largest blind, it does act as his/her opening bet and may either call or make the prescribed raise in turn.

If the blinds pass a player's position while away from the table, the player may resume play by posting total amount of blind. The small blind goes to the center of the pot, while the big blind is live. The player may also just wait for his/her big blind.

If a player is dealt more or less cards than the game

he/she is playing in calls for, and it is discovered before two players act on their hands, it is a misdeal. If it is discovered after two players have acted, all monies, antes and blinds are forfeited by that player.

If the flop has the incorrect number of cards (too many), it is taken back and re-shuffled except the burn card will remain burned. No new burn card will be used.

If cards are flopped by the dealer before all betting is completed, the entire flop is taken back and reshuffled. The burn card will remain and no additional one will be used for this flop.

If a dealer turns up the fourth card on the board before the round of betting is completed, the card will not play. Betting for that round is completed, the next card is burned and the fifth card is put in the fourth card's place. After betting is completed, the dealer will reshuffle the deck, including the card that was taken out of play but not the burn card or discards. The dealer will then deal the fifth card.

If the fifth card is turned up before betting is complete, it shall be reshuffled as in the previous rule.

# Royal Flush Casino

## “AA Blackjack”

With Buster Bonus

### Submittal

Royal Flush Casino would like to spread a new variation of blackjack called AA Blackjack with Buster Bonus bet. Royal Flush Casino will take a collection fee based on the total dollar amount of the bets.

### AA Blackjack Procedures:

A Player/Dealer button will be passed by a Royal Flush Casino card dealer from spot 1 to spot 7. The opportunity to bank the game is offer to the seated Player on each spot with the Player/Dealer button. The Player is allowed 2 banks before the Player/Dealer button is passed to the next spot. After the Player/Dealer button passes spot 7, the Player/Dealer button will go back to spot 1. In the event that a Player/Dealer bank does not cover the other Player’s total bets, the Royal Flush Casino card dealer will announce that the bank does not cover all the bets so all the Players will know as such.

### How AA Blackjack is played:

A Royal Flush Casino card dealer will ask players to place their bets. Each Player plays against the Player/Dealer. Each Player will receive two cards face up and the Player/Dealer will receive two cards but with the first card face up and the second card face down from a standard 52 card 6 deck shoe. The card dealer will ask from left to right if the players would like to hit or stay. With their two face up cards and if they choose to take additional cards from the shoe, their objective is to make a natural hand 22 or a hand closer to 21 than the Player/Dealer without going over 21 or otherwise called busting. If the Player bust, he/she lose. After the Player decides to stay, the card dealer will proceed to

the next player to the right if he/she wants to hit or stay. After all Players have stayed or busted, the card dealer will open the Player/Dealer's face down card. The card dealer will then hit Player/Dealer's hand until they make a hand of hard 17 or more. Any soft hands 17 or less, Player/Dealer has to hit. Players with a hand closer to 21 without busting win over Player/Dealer. If the Player/Dealer bust, all Players who have not bust win. Winning Players are paid out from the Player/Dealer's bank equivalent to the amount that they bet and losing Players' bet is given over to the Player/Dealer. A Player/Dealer can only win and lose as much as they have in their bank. In the event that both a Player and the Player/Dealer has the same numerical valued hand of 21 or less then it is a push and neither wins or loses. This blackjack card game is played with either 6 or 8 decks shoes. Ace will be marked "natural A" Back line betting is permitted. Back line bettor must place a bet on the base game in order to place a wager on the bonus bet. Ace always have a value of 1 or 11. Player will have options on any hand. 22 is the NATURAL HAND and can only made with the first cards dealt that must be AA. Any other 22 is not the natural hand, example ( 10 and 2 and J), and is a busted hand. In AA Blackjack, the player/dealer cannot make the Natural Hand, only the players are allow to get the Natural Hand. There will be no option of surrender or insurance in this AA blackjack game. No extra collection fee taken for any double down or split.

### **Buster Bonus Bet:**

There is an optional bet which has no bearing on players' AA Blackjack bet called the Buster Bonus. The Buster Bonus bet is already approved to be played in several card rooms such as Capitol Casino, Silver Fox Casino, and Cordova Casino. This bet has nothing to do with the Player's own hand but rather the Player/Dealer's hand. To win this bet, the Player/Dealer must bust. The payout depends on how many cards the Player/Dealer bust with. If a Player/Dealer' hand does not bust, the Player lose. This bet will be banked by the Players as well but no collection will be taken from the Players. In the event that the Player/Dealer's bank does not cover the potential payout, the Royal Flush Casino card dealer will announce that bank does not cover so all Players know as such. The bank on this

will be separate from the AA Blackjack bank as well. So AA Blackjack bank covers the AA Blackjack bets and the Buster Bonus bank covers the Buster Bonus bets. As with the AA Blackjack bank, the Player/Dealer can only win or lose as much as their Buster Bonus bank covers.

### *Rules in AA Blackjack:*

1. A natural hand is getting dealt 2 aces as a starting hand. The payout is 2 to 1.
2. Only a Player not the Player/Dealer can get a natural hand. The Player getting dealt this wins automatically.
3. If a Player/Dealer gets dealt 2 aces on their first two cards, it counts as 2 or soft 12.
4. Ace and a face card or 10 is just 21 and is not a natural hand.
5. Splits – a Player may split up to 3 times only. In order to split, the first 2 cards dealt to them must have equal value. Splitting also requires the Player to match the original bet.
6. Players may not split a natural blackjack.
7. Double down - a Player has the option to double down on any 2 starting cards dealt to them except on a Natural Hand. A Player also has the option to double down on any first 2 starting cards on splits.
8. The Player/Dealer must stay on a hard 17 or more.
9. Whoever is the seated Player makes the decision on hitting, splitting, doubling down, and staying.
10. The table limit on AA Blackjack is \$1 - \$300 (one dollar minimum bet with a three hundred dollar maximum bet).

### *Rules in Buster Bonus Bet:*

1. This is an optional bet.
2. In Order to win the Buster Bonus Bet, the Player/Dealer must go over 21 or “busts”.
3. The Buster Bonus Bet has to be equal or less than the original bet. For example, if the original bet is \$50, then the Minimum bet on the Buster Bonus is \$1 and the Maximum bet is \$50.

4. No collection on the Buster Bonus Bet.

*Payouts on Buster Bonus Bet:*

- 3 card bust – pays 1 to 1
- 4 card bust – pays 3 to 1
- 5 card bust – pays 5 to 1
- 6 card bust – pays 15 to 1
- 7 card bust – pays 40 to 1
- 8 card bust or more – pays 200 to 1

*Determining Where Action and Paying out Starts:*

The second card dealt to the Player/Dealer determines the action where paying winning bets or collecting losing bets starts. For example, the second card dealt to the Player/Dealer is a 9, the card room dealer will then start and count 9 spots clockwise to the left of the Player/Dealer Button, do not count the Player/Dealer as a spot. That is where the action for paying and collecting bets starts. Ace is 1 spot clockwise, 2 is two spots clockwise, 3 is three spots clockwise, 4 is four spots clockwise, 5 is five spots clockwise, 6 is six spots clockwise, 7 is seven spots clockwise, 8 is eight spots clockwise, 9 is nine spots clockwise, 10 is ten spots clockwise, Jack is eleven spots clockwise, Queen is twelve spots clockwise, and King is thirteen spots clockwise.

Collection Rates:

The Player does not pay any collection fee. Only the Player/Dealer pays for the collection fee.

\$1 - \$20	no collection fee
\$21 - \$100	fifty cents collection fee
\$101 - \$200	one dollar collection fee
\$201- \$300	two dollar collection fee
